11. What To Do If Something Stops Working

1. Signing Into the Laptop

- ★ Turn on the laptop and wait for the sign-in screen to appear.
- ★ Click anywhere on the screen or press any key on the keyboard to pull up the login boxes.
- ★ Type the temporary password or PIN you were given
 - ⊗ Temp. Password: **Ymir2026!**
 - ⊗ Temp. Pin: **1423**
- ★ Press *Enter* or click the arrow button to log in.
- ★ Once logged in, you will arrive at the Desktop screen.

2. Changing or Removing Your Password/PIN

- ★ Click the *Start Button* in the bottom-left corner.
- ★ Click the *gear* icon, called *Settings*.
- ★ Click *Accounts*.
- ★ Click *Sign-in options* on the left side.

To change your password:

- ★ Click *Password* → *Change*.
- ★ Enter the current password.
- ★ Enter the new password you want.
- ★ You can also leave the new password blank if you do not want one. - DO NOT RECOMMEND FOR SECURITY REASONS

To change or remove your PIN:

Click *Windows Hello PIN*.

Click *Change* to make a new PIN.

Or click *Remove* to stop using a PIN completely. - DO NOT RECOMMEND FOR SECURITY REASONS

3. Connecting to Wi-Fi

- ★ Look at the bottom-right corner of the screen.
- ★ Click the *Wi-Fi* symbol.
- ★ Choose your *Wi-Fi network name* from the list. (If using mobile hotspot from phone, go into phone settings, click *Personal Hotspot*, and it should tell you what to look for to connect.)
- ★ Click *Connect*.
- ★ Enter the Wi-Fi password carefully.

- ★ Click *Next*.
- ★ When connected successfully, the Wi-Fi icon will look *solid* instead of showing a *globe*.

4. Adjusting Brightness & Volume

To change brightness:

- ★ Open *Settings* → *System* → *Display*.
- ★ Drag the brightness slider left or right.

To change volume:

- ★ Click the *speaker icon* in the bottom-right corner.
- ★ Drag the slider left or right.

5. Changing Background & Lock Screen

- ★ Right-click anywhere on the Desktop.
- ★ Click *Personalize*.

To change the desktop background:

- ★ Click *Background*.
- ★ Choose *picture*, *color*, or *slideshow*.
- ★ Click *Browse* to choose your own picture from your pc.

To change the lock screen image:

- ★ Click *Lock screen* on the left side.
- ★ Choose a picture or click *Browse*.

6. Connecting Bluetooth Devices

- ★ Turn on the Bluetooth device first.
- ★ Open *Settings* → *Devices* → *Bluetooth & other devices*.
- ★ Turn Bluetooth *ON*.
- ★ Click *Add Bluetooth or other device*.
- ★ Click *Bluetooth*.
- ★ Wait for your Bluetooth device name to appear in the list.
- ★ Click the Bluetooth device name in the list and then click *Connect*.

7. Connecting to a Wi-Fi Printer

- ★ Make sure the printer is powered on.
- ★ Make sure the printer is connected to the same Wi-Fi network as the laptop.
- ★ Open *Settings* → Devices → *Printers & scanners*.
- ★ Click *Add a printer or scanner*.
- ★ Wait for the printer name to appear in the list.
- ★ Click the printer name.
- ★ Click *Add device*.

8. Logging Into Zoom Workplace (or Creating an Account)

If you need to create a new account:

- ★ Open *Zoom Workplace*
- ★ Click *Sign Up*
- ★ Enter your email address
- ★ Follow the prompts to verify your email (check your inbox and spam folder)
- ★ Create a password when prompted after you've verified your email address.
- ★ Complete any additional setup steps shown on screen
- ★ Once finished, return to *Zoom* and click *Sign In*
- ★ Enter your email and password used to sign up
- ★ Click the *Sign In* button

If you already have an account:

- ★ Open *Zoom Workplace*
- ★ Click *Sign In*
- ★ Enter your email address and password
- ★ Click *Sign In* button

To join a meeting:

- ★ Click *Join*.
- ★ Enter the Meeting ID.
- ★ Enter the passcode if needed.
- ★ Click *Join Meeting*.

9. Logging Into Discord

- ★ Open *Discord*.
- ★ Enter the email address you used to sign up.

- ★ Enter your password.
- ★ Click *Login*.

10. Restarting the Laptop

- ★ Click the *Start* Button.
- ★ Click the *power* icon.
- ★ Click *Restart*.
- ★ Restarting fixes many common issues.

11. What To Do If Something Stops Working

Try these steps first:

- ★ *Close* and *reopen* the app.
- ★ Check the *Wi-Fi connection*.
- ★ **Restart the laptop.**
- ★ Make sure any cables are plugged in correctly, including the power cord if needed.
- ★ **Google** is everyone's best friend, even an IT professional, especially if you have specific error codes or messages you can search.

**Ask me for help if needed; I'm always
happy to help where I can!**
