

WINDOWS 11 BASICS LAPTOP GUIDE

Welcome! This laptop has already been all set up for you. Most things should be ready to use right away. This is a basic Windows 11/Gateway beginner guide for you to use if you need help ^_^

Table of Contents

1. Signing Into the Laptop
2. Changing or Removing Your Password/PIN
3. Connecting to Wi-Fi
4. Adjusting Brightness & Volume
5. Changing Background & Lock Screen
6. Connecting Bluetooth Devices
7. Connecting to a Wi-Fi Printer
8. Logging Into Zoom Workplace
9. Logging Into Discord
10. Restarting the Laptop
11. What To Do If Something Stops Working

SIGNING INTO THE LAPTOP

- ★ Turn on the laptop.
- ★ When the lock screen appears, click anywhere or press a key.
- ★ Enter your **PIN**:
 - **PIN**: 1423
- ★ Press Enter.

*You do NOT need your Gmail or Microsoft password every time you log in. The **PIN** is enough.*

CONNECTING TO WI-FI

- ★ Click the Wi-Fi icon in the bottom-right corner.
- ★ Select your Wi-Fi network.
- ★ Click Connect.
- ★ Enter your Wi-Fi password.
- ★ Click Next.

Once connected, the Wi-Fi icon will show bars instead of a little grid globe.

ADJUSTING VOLUME

- ★ Click the speaker icon in the bottom-right corner.
- ★ Move the slider left or right.

You can also use the volume keys on the keyboard.

ADJUSTING SCREEN BRIGHTNESS

- ★ Click the battery, speaker, or Wi-Fi icon in the bottom-right corner.
- ★ Move the brightness slider left or right.

CONNECTING BLUETOOTH DEVICES

For headphones, speakers, earbuds, etc.

- ★ Open Settings.
- ★ Click Bluetooth & devices.
- ★ Make sure Bluetooth is turned ON.
- ★ Click Add device.
- ★ Select Bluetooth.
- ★ Choose your device from the list.

ADDING A PRINTER

Prepare the printer

- ★ Turn the printer on
- ★ Load paper and make sure it has ink/toner
- ★ If USB, plug it into the laptop
- ★ If wireless, make sure it is on the same Wi-Fi as the computer
- ★ Open printer settings
- ★ Click Start
- ★ Type "Printers & scanners"

- ★ Open Printers & scanners
- ★ Click Add device
- ★ Wait while Windows searches
- ★ If your printer appears, select it and click Add device

If the printer doesn't show up:

- ★ Click "The printer that I want isn't listed," then try:
- ★ Select Add a Bluetooth, wireless, or network printer
- ★ Or select Add a local printer
- ★ Choose USB port (usually USB001)
- ★ Continue to install

Test it

- ★ Open any file
- ★ Press Ctrl + P
- ★ Select your printer
- ★ Print a test page if available

Quick fixes if it does not work

- ☐ Restart the printer and laptop
- ☐ Reconnect USB cable
- ☐ Confirm both devices are on the same Wi-Fi
- ☐ Remove the printer and add it again

PRINTING

- ★ Make sure the printer is turned on.
- ★ Make sure the printer is connected to the same Wi-Fi network.
- ★ Open Settings.
- ★ Click Bluetooth & devices.
- ★ Click Printers & scanners.
- ★ Click Add device.

CHANGING YOUR BACKGROUND

- ★ Right-click an empty area of the desktop.
- ★ Click Personalize.
- ★ Click Background.
- ★ Choose a picture or browse for your own.

RESTARTING THE LAPTOP

If something acts weird:

- ★ Click the Start button.
- ★ Click the Power button.
- ★ Click Restart.

This fixes a surprising number of problems.

WINDOWS UPDATES

It is perfectly fine and encouraged to install Windows updates.

- ★ Open Settings.
- ★ Click Windows Update.
- ★ Click Check for Updates.

Let updates finish before shutting the laptop off.

IF SOMETHING ISN'T WORKING

Try these steps:

- ☐ Close and reopen the program.
- ☐ Check the Wi-Fi connection.
- ☐ Restart the laptop.
- ☐ Make sure any cables are plugged in.
- ☐ Read any error message carefully.
- ☐ Search Google for the exact error message.

PASSWORDS & ACCOUNTS

- ★ Your Gmail and Microsoft accounts are still yours. I did NOT change your account passwords.
- ★ The PIN only unlocks the laptop itself.

STILL NEED HELP?

If you can't figure something out, get stuck, or receive an error message you don't understand:

- ★ Take a picture of the screen and send it to me. That will usually help me figure out the problem much faster.
- ★ Explain what is going on, including the steps you were taking, what you were trying to accomplish, what apps or programs were you using, and what error codes or messages are you getting or what error is occurring.

**Ask me for help if needed; I'm always
happy to help where I can!**

Enjoy the laptop!
